

Press Release & Product Specification

Cubic Bowl

The newest member of DesignedMade's family of fruit bowls.

The Cubic Bowl is one of a family of shallow, powder-coated steel fruit bowls with distinctive laser cut patterns that allow air to reach the fruit. The Op-Art inspired design of this bowl creates the intriguing illusion of an undulating surface with varying depth.

The bowl is made from 1.5mm steel, which is laser-cut and then pressed. The stud-welded legs are then positioned and fired on prior to powder coating.

The product itself has been designed and manufactured to the highest of standards. Made with pride from laser-cut steel in Britain.
